DETAILED ACTION

Response to Arguments

Applicant's arguments filed September 29, 2008 have been fully considered but they are not persuasive.

Regarding applicant's argument on page 2 pertaining to same rejection was presented on 11-06-2000 and mailed on 11-09-2000.

After reviewing the paper file of application 08/861,247, no such rejection has been made where the Patent 3,582,815 to Larry D. Siebert has been cited.

Regarding applicant's arguments on page 2 pertaining to the recited limitation of "said gain region within a narrow area".

The recited terms of narrow area is considered broad language and it is not limited to a slice shape, thin gain medium or disk shape as implied by applicant. Furthermore, claim 10 does not recite a thin gain region, a slice shape nor a disk shape and a narrow area does not exclude a line shape gain region, as applicant has characterize the gain medium of the Siebert reference. Applicant's attention is directed to MPEP 2111 Claim Interpretation.

Regarding applicant's arguments on page 3.

Applicant has argued limitations which are not recited within the claim language of claim 10, thereby the arguments are irrelevant.

Regarding applicant's arguments pertaining to notes 1-4.

Applicant's arguments do not discuss the cited prior art rejection of claim 10, thereby the arguments are irrelevant.

Response to Amendment

The amendment filed September 29, 2008 proposes amendments to claims 10-15 that do not comply with 37 CFR 1.173, which sets forth the manner of making amendments in reissue applications. A supplemental paper correctly amending the reissue application is required.

In particular claims which have been deleted, it appears that claims 11, 12, 14 are deleted.

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2828

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 13.

It is not clear which claim it depends from, since claims 11, 12 and 14 appear to have been deleted and claims 10 and 15 do not recite polarization.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Siebert (PN 3,582,815).

Figure 2 illustrates a solid state laser including two mirrors (10), (18), a solid state laser medium (12), the illustrates a gain region (shaded), a wavelength selective etalon (24), the figure illustrates the gain region in a narrow region and adjacent to mirror (10). Column 2 lines 10-14 discloses the single mode operation.

Siebert discloses the use of flash lamp as a pump source, but is silent as to the pump source being laser diode bars.

However, the use of laser diode bars as pump sources for solid state lasers is notoriously well known in the art due to its cost effectiveness, Spectra Diode Labs provide such commonly used laser diode bars.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the searched prior arts alone or in combination discloses the claimed method limitations of independent claim 1, having the combined recited steps for forming a laser cavity to obtain stable single mode operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2828

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
